ICPerMed Working Group 2
Personalised Medicine in Healthcare

Our Focus

Contribute to improved diagnosis, treatment and prevention by a better integration of personalised medicine approaches into healthcare

Our Aims

Facilitate knowledge exchange and strengthen the role of R&I

Enhance health professionals' involvement

Improve individual and public engagement

Contribute to the implementation within healthcare systems

Study real world examples in healthcare

Promote strategies supporting better synergies between R&I and healthcare

Encourage the use of models for the benefits of healthcare systems

Value the importance of health data

Support economic development in the healthcare sector

Our Activities

Mapping and analysis of the field of PM application and implementation scenarios

Analysis of challenges and opportunities for the implementation of PM approaches

Contribution to the development of a registry/observatory of Best Practice Examples

Development and sharing of already existing strategic papers/recommendations and other communications supporting better synergies between R&I and healthcare and encouragement of the use of existing models for (national and regional) health systems

Organisation of and support for ICPerMed events
